Chuck,  
This is a crazy week w/ a grant deadline & I am out Thursday & Fri. I would be happy to meet Monday of next week.

Julie, I'd like to meet sometime this week to discuss an upgrade for Peter Piro from a Chemist 3 to a Lab Supervisor 1. I realize these are very bad budget times, but this is something that I should have done several months ago. Peter has been supervising the GC/MS laboratory for several years now and is most deserving of this. I'm in all week and available any time to get together and discuss. Thanks. CBS

**Subject:** RE: February/Worcester results

since we did not receive the results until March, let's include them in the March tally. While not entirely accurate, it will at least account for those samples.  
Going forward, maybe we could time the pick/delivery to Worcester to within the same calendar month.

**Subject:** February/Worcester results

This past week I entered the results received back last week from the Worcester lab which included a large number of samples analyzed in February. How does this impact the Feb monthly report? I do not believe they were included in the tally. I would assume we will have the same issue going forward.

Thanks, Betsy
